Self-leadership: How to Become a More Successful, Efficient, and Effective leader from the Inside Out

With the flattening of hierarchies, global teams and the need for empowered and engaged employees, a new style of leadership is required. In this context, Andrew Bryant, and co-author Dr Ana Kazan, wrote Self-Leadership in order to provide tools and techniques that develop leadership in one's self and in others, with the result that you can more effectively achieve outcomes that are aligned with an individual's or an organisation's core values, even during periods of uncertainty and rapid change.
